Modern Home Concepts

We provide homeowners, architects, builders and electricians with the necessary advise, solutions and support to meet today's digital and connected lifestyles

**STAR
TECHNOLOGY**

“The most expensive cable that can be installed is the one that did not get installed in the first place.”

What We Do

Whether you are starting out fresh or modernizing your existing property, we can assist you with a range of services to ensure you get the right results from start to finish. Our specialties include:

- Internet of Things (IoT) ready homes
- Reliable Wi-Fi distribution for Large homes and Luxury Apartment complexes.
- Fiber (FTTx) and Structured Data cabling
- Networked Security and CCTV Solutions
- Video Door Phone Solutions
- Wireless and Multi-room audio solutions
- Multi-media Home Server Solutions
- Centralized multi-media libraries
- Home Automation & Smart Lighting
- Solar Renewable Energy Solutions

Why do I need this?

Home constructions in Sri Lanka can pose some unique challenges which require experienced know-how to ensure a successful outcome.

For example, your internet service provider equipment is not always able to cover all areas of your home with Wi-Fi reliably.

The result is a poor digital experience for everyone, often worsened by adding poor quality Wi-Fi Range Extenders to try solve the problem. This often leads to complaints with your service provider for ‘slow’ broadband speeds when this actually might not be the case.

Fact: Did you know your Wi-Fi bandwidth **speed is halved** each time an extender appliance is added into your home?

What is needed then?

1. A holistic approach, which considers the entire property from the technical, aesthetic and functional aspects.
2. Solutions which cater to your current needs as well as those you and your family may desire in future.

Who We Are

We are a team of enthusiastic technology specialists with combined industry experience of 15 years across multiple specialist roles including: Solution design, architecture, installation, engineering and project management.

Our industry exposure spans local Sri Lankan and international markets including New Zealand to bring you a best-practices based approach for both small and large scale projects.

Contact us today to discuss how we can help you find the best-fit solutions to suit your unique requirements.
